ONLINE FEEDBACK SYSTEM
PROJECT REPORT

Submitted by: T.Shiva Naga Parvati

Course: B.Tech

Technology: Java, JSP, MySQL, Apache Tomcat

Institute: SSSIT

ABSTRACT

The Online Feedback System is a web-based application that allows students to provide feedback about faculty and courses. The system provides secure login for students and admin. The feedback is stored in a database and reports are generated. This system reduces manual work and improves efficiency.

INTRODUCTION

The Online Feedback System helps colleges collect feedback digitally. Students can login and submit feedback. Admin can view reports. This system is developed using Java, JSP, and MySQL.

OBJECTIVES

- To develop online feedback system
- To store feedback in database
- To generate reports
- To reduce paperwork
- To improve quality

SYSTEM REQUIREMENTS

Software Requirements:

- Java
- JSP
- MySQL
- Tomcat

Hardware Requirements:

- 4GB RAM
- Intel Processor
- 500GB Hard Disk

SYSTEM ARCHITECTURE

The system consists of frontend, backend, and database. The frontend is JSP, backend is Java, and database is MySQL.

MODULES

Admin Module:

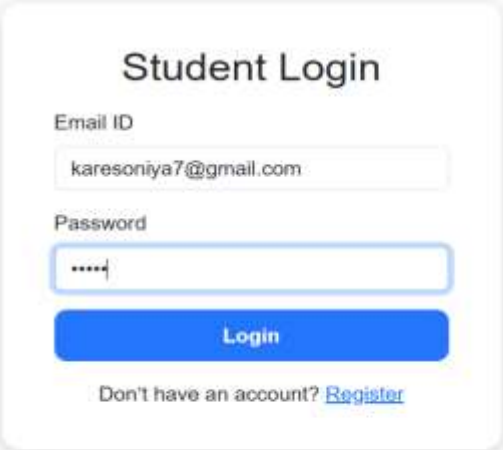
- Login
- View feedback
- Manage students

Student Module:

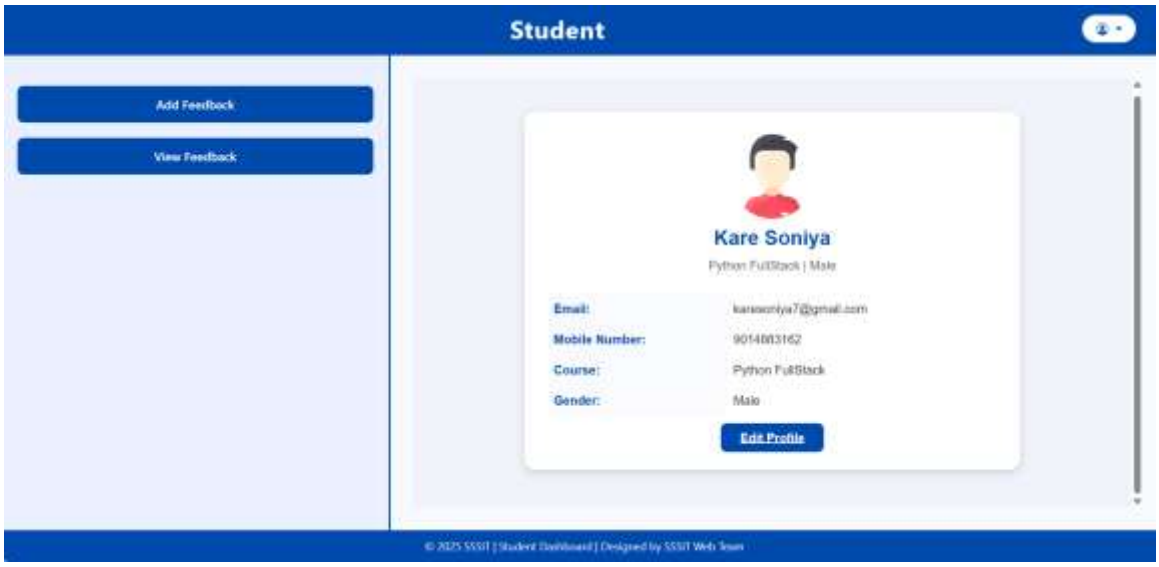
- Login
- Submit feedback
- Logout

SCREENSHOTS

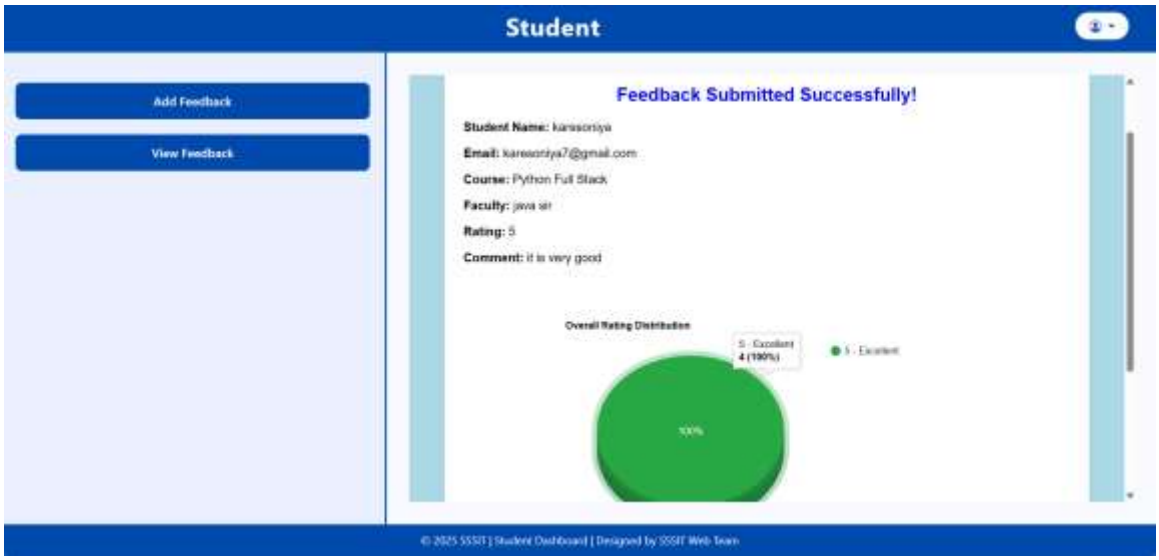
1. Login Page Screenshot:



2. Student Dashboard Screenshot:

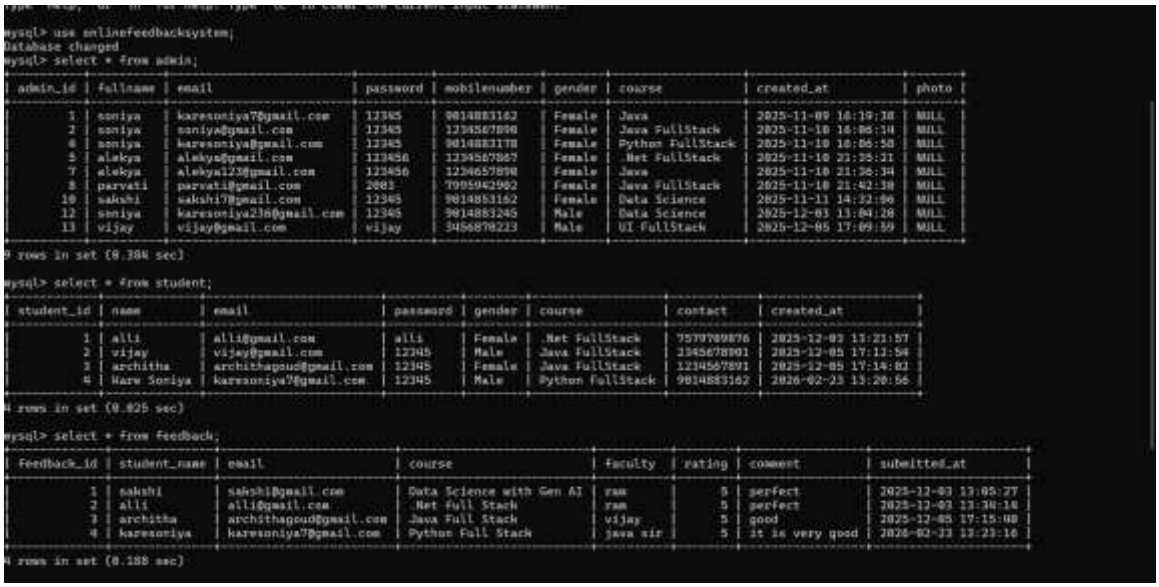


3. Feedback Form Screenshot:



4. Admin Dashboard Screenshot:

5. Database Screenshot:



```
mysql> use onlinefeedbacksystem;
Database changed
mysql> select * from admin;

CONCLUSION

The system helps collect feedback easily and improves education quality. It is secure and easy to use.

FUTURE ENHANCEMENT

- Add charts
- Improve design
- Add email system
